UNAC – UN Day Celebrations

Environmental Sustainability in Calgary – Panel

Where: Kahanoff Conference Centre
(105 12 Ave SE #200, Calgary, AB)

Date: Monday, October 24th – UN Day

Time: 5:30 to 8:30 PM

The topic is Environmental Sustainability in Calgary (further divided to include SDG's #11: sustainable cities & communities, and #12: responsible consumption). Aim is to highlight the ongoing efforts in Calgary to maintain a healthy and manageable ecosystem for future generations, discuss how local economic factors impact global objectives, and learn about the small changes citizens can make to ensure we are not wasting limited natural resources.

The qualifications I am looking for are: 15+ years work with environment design, environmental sustainability. Involved with youth and adult engagement in areas of responsible consumption, water conservation, water sanitation, landfill and waste reduction. Has experience working outside of Calgary within these areas.

Topics to address:

- Sustainability policies and actions during current economic conditions in Calgary.
- Addressing environmental sustainability in a way that also promotes social equity in Canada and within the indigenous communities.
- Many organizations (private and non-profit) already have sustainability measures in place. Are there opportunities to improve their progress?
